IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Aqua Pennsylvania Mt. Jewett (PWSID# PA6420018)

BOIL YOUR WATER BEFORE CONSUMPTION

HIERVAN EL AGUA ANTES DE USARLA.

ESTE INFORME CONTIENE INFORMACIÓN MUY IMPORTANTE SOBRE SU AGUA POTABLE.

TRADÚZCALO O HABLE CON ALGUIEN QUE LO ENTIENDA BIEN

Aqua Pennsylvania, Inc. (Aqua) has issued a boil water advisory for customers in the Mt. Jewett water system as a result of the chlorine disinfection dropping below the state required minimum level. The disinfection system issue has been resolved however, Aqua customers in this area are advised to use boiled or bottled water for drinking, making ice, brushing teeth, washing dishes and food preparation until further notice. You will be notified when this advisory is lifted.

What should I do?

- **DO NOT DRINK THE WATER WITHOUT BOILING IT FIRST.** Bring all water to a boil, let it boil for one minute, and let it cool before using, or use bottled water. Boiled or bottled water should be used for drinking, making ice, brushing teeth, washing dishes, and food preparation **until further notice**. Boiling kills bacteria and other organisms in the water.
- ***Inadequately treated water may contain disease-causing organisms. These organisms include bacteria, viruses, and parasites, which can cause symptoms such as nausea, cramps, diarrhea, and associated headaches.***
- The symptoms above are not caused only by organisms in drinking water, but also by other factors. If you experience any of these symptoms and they persist, you might want to seek medical advice. People at increased risk should seek advice about drinking water from their health care providers.

What happened? What is being done? When will the problem be corrected?

Due to a failure of the disinfection system, chlorine disinfection dropped below the state required minimum level. The disinfection system issue was corrected. However, per the PA Department of Environmental Protection (DEP), additional samples are being collected in the system for bacteriological testing. Until test results are received from the laboratory, Aqua customers in this system are advised to use boiled or bottled water for drinking, making ice, brushing teeth, washing dishes and food preparation until further notice, which would be no sooner than Friday, June 26th.

General guidelines on ways to lessen the risk of infection by microbes are available from the EPA Safe Drinking Water Hotline at 800.426.4791.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
